**Normalized Site Attenuation Request Form**

Customer Name: \_\_\_\_\_ Contact: \_\_\_\_\_

Location of the Test: \_\_\_\_\_ Purchase Order Number: \_\_\_\_\_

Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

The customer request and agrees to pay for a Normalized Site Attenuation (NSA) Measurement(s) perform at the customer's site. The customer agrees to free up the facility for the time needed to perform the NSA measurement(s). The customer will furnish the electricity, site cabling, and receive tower normally used to perform these measurements.

The customer agrees not to hold Liberty Labs, Inc. or its personnel responsible for loss time at the lab or equipment problems that would fall under normal wear and tear. Liberty Labs, Inc. will supply the antenna, spectrum analyzer, cabling, attenuators, personnel, and any other equipment needed to perform the NSA testing.

A schedule date will be agreed to in advance and may be cancelled by either party providing 3 working days advance notice.

Once on site, measurements will be performed to Liberty Labs, Inc. documented and release procedures. A comparison will be made between Liberty Labs Standards and the customer site to ensure accuracy of the test data. This comparison will be done throughout the testing as well as tests will be repeated to insure repeatability. The data will be stored and backed up with Liberty Labs, Inc. and a copy will be given to the customer.

Once the NSA is completed the data will be analyzed back at Liberty Labs, Inc. and a report written to the customer stating compliance. The customer will also receive a certificate stating compliance and providing the traceability needed by the test laboratory.

The signatory below indicates that the customer has read the information given above and agrees to providing their facility on an agreed upon date and timeframe for the purpose of Liberty Labs, Inc. conducting a Normalized Site Attenuation Measurement.
