

Liberty Labs, Inc.

Protect your calibrated equipment in a tough shipping case!

We offer a wide range of custom shipping cases built to protect Liberty Lab's calibrated antennas, test equipment and accessories. These cases are built according to the Air Transit Association's guidelines for shipping cases (ATA-300). They are tough and designed to be shipped again and again.

Each case has a custom interior engineered to protect the equipment inside during transit or storage — giving you peace of mind.

Many of our customers have already taken advantage of this great service. They testify to how well these cases stand the test of shipper abuse, the ease of use and the savings of time and money. Find out how to protect your investment, call today (712)773-2199.

Current Shipping Case Applications

NOTE: If your requirement is not in this list - we can still provide a case for your application.
